SUMMARY

My goal is to work as a UX/UI designer or developer.
I learned the necessary skills of design and developer with a lot of effort to achieve my goal. I graduated from the UX Design Diploma course at Yoobee, and I hold certifications related to UX design.

I know how important teamwork and time management are while doing various jobs in the past, and I think that is my strength. Also, I studied 3D graphics in South Korea, so I have advantages in video editing and 3D graphics.
